Chapter 2, Section 1, P. 43

1. What are the three main ideas of cell theory?

2. Why is the nucleus so important to the living cell?

3. How do cells get energy they need they need to carry on their activities?

4. What is the purpose of a cell membrane?

5. **Think Critically** Suppose your teacher gave you a slide of unknown cell. How would you tell whether the cell was from an animal or from a plant?
